

Ravendale® Graphite Slate

Wallace International

slate
uk

Ravendale® is without doubt one of the most interesting stones on the market, offering excellent availability and value for money, with an appearance similar to old Welsh blue black slate and Reclaimed Cumbrian Blue Grey slate

Ravendale® is almost unique in appearance with a graphite grey colour and non grainy slightly riven surface, a sedimentary stone with an attractive edge detail.

Ravendale® is completely free from Iron Pyrites and requires the minimum of grading due to its consistency of thickness.

Ravendale® slate will give many years of trouble free service.
