

Vermont Structural Unfading Green Slate

Vermont Structural Unfading Green slate is a top of the range slate, highly regarded world-wide as one of the very best Green slates available. It has been used in the USA and the United Kingdom for centuries on many prestigious buildings. Details of projects in the UK date back to the 1890's where the slate is still on the roof today doing what it was made to do – protect the building from the harsh elements. In more recent times it has also been approved on specific English Heritage projects, Crown Estates and also in several National Parks.

Vermont Structural Unfading Green is markedly different to other green slates from the North East of America in several important ways. It is all produced from block extracted from a single family owned & run quarry, the raw block is then cut in the production sheds to ensure that the slates are made “on the grain”. This greatly improves strength, longevity and workability of the finished roofing slate

SLATE SPECIFICATIONS

Country of Origin:

United States of America

Colours:

Green Grey

Texture:

Medium Riven Texture

Thickness:

Prime - 7mm Nominal Thickness

Sizes:

Diminishing Course x Random Widths

Fixed Length x Random Widths

Patterns - Single Sizes

Performance:

TESTING

ASTM1 Certification

Water Absorption

0.13 of 1% in 48 hours
Per ASTM C-121-48

Thermal Cycles Test

Sulphur Dioxide Test

Guarantee

Over 150 years of empirical performance
within the UK.

Supply:

Extensive stocks are held at our
distribution centres.

Nationwide and International delivery
can be arranged for immediate despatch.

Unit 15 & 16, Airfield Approach Business Park
Flookburgh
Grange over Sands
Cumbria
LA11 7NG
England
